## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a game system with processing components, classified in class 712, subclass 1.
- II. Claims 11-21, drawn to a distributed gaming system, classified in class 463, subclass 42.
- III. Claims 22-28, drawn to an electronic gaming machine, classified in class 463, subclass 1.
- IV. Claims 29-37, drawn to a server, classified in class 719, subclass 310.

Inventions I-IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the game system of invention I does not require the particulars of the electronic gaming machine, the distributed gaming system or the server in order to function. Furthermore, Invention I does not even have to be utilized with a server or distributed gaming system to function. The subcombinations have separate utility such as an electronic gaming machine that can be operated under any gaming system, not requiring the particulars of Invention I, a distributed gaming system involving communication between gaming systems, not necessarily

Art Unit: 3713

the specific program processing components or game platforms of the gaming system of Invention I. Furthermore, Invention IV, the server, can be used with any network communication system.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
